Summary

Senior Engineer with 6+ years building and scaling production systems, now driving product ownership for an AI chatbot platform. Architected an AWS EKS platform from scratch now serving 3,000+ active users, and led AWS/Azure deployments across 8 regions for 10,000+ employees. Strong background in platform engineering, DevOps, and applied AI (RAG, NLU, agentic systems).

Experience

AutomationEdge Pune, Maharashtra

Senior Engineer *April 2024 – Present*

- Led AIStudio chatbot framework's product roadmap, driving both long-term direction and short-term release planning across features and fixes.
- Expanded AIStudio with licensing and multi-cloud retrieval-augmented generation (AWS and Azure), and optimized the framework for accuracy and performance, driving increased user engagement.
- Deployed AIStudio on Azure VMs for a production client, used across 8 regions by 10,000 employees. Delivered a secure, scalable, and timely rollout.
- Architected an AWS EKS platform from scratch for CareFlo, using Terraform with modular configuration and remote state — now supporting 3,000+ active users.
- Built CI/CD pipelines (ECR, CodeBuild, ArgoCD) and Grafana-based observability for CareFlo, then trained developers to deploy independently — cutting release friction across the team.
- Tech stack: Python, Django, AWS, Azure, Docker, Kubernetes, Terraform

Engineer *February 2020 – March 2024*

- Built AIStudio, a chatbot framework enabling NLU and knowledge-article search models, integrating predictions into chatbots that interact seamlessly with AutomationEdge's RPA workflows.
- Developed the backend for AIStudio's NLU data-labeling components from scratch — the product's inception — including database models, business logic, and the REST API interface.
- Dockerized and deployed AIStudio on Kubernetes (Azure), ensuring consistent, seamless deployments across environments.
- Streamlined and automated the release process using Azure DevOps, reducing manual intervention and accelerating time-to-market for new features.
- Tech stack: Python, Django, PostgreSQL, Gunicorn, Redis, Docker, Kubernetes, Azure DevOps.

Glocal Healthcare Systems Pvt. Ltd. Kolkata, West Bengal

Research and Development Engineer *May 2019 – February 2020*

- Trained a one-vs-rest random forest classifier on patient data (age, gender, location, vitals, symptoms) and deployed it on Amazon SageMaker — the company's first step into AI-driven care.
- Maintained the video and text communication interface for HelloLyf, an online doctor consultation platform.
- Tech stack: Java, WebRTC, Python, numpy, pandas, scikit-learn, Amazon Sagemaker.

Technical Skills

Languages: Python, SQL
Softwares and Tools: Git, PostgreSQL, Redis, Docker, Kubernetes, Azure DevOps
Web Technologies: Django, Gunicorn, NGINX
Skills: Web Development, Backend Development, DevOps
Cloud Platforms: Microsoft Azure, AWS

Education

Indian Institute of Information Technology, Sri City Chittoor, Andhra Pradesh

B.Tech., Computer Science and Engineering *2015 – 2019*
